EMAIL:

Do you have any allergies?      Yes      No

Do you have any skin conditions or are you currently peeling from a sunburn?      Yes      No

Do you have a respiratory illness?      Yes      No

Are you pregnant or nursing?      Yes      No

- Spray tanning is accomplished by the application of a solution containing the active ingredient DHA (Dihydroxyacetone). It is considered safe and has been approved by the FDA for cosmetic use.
- All people are different. All ingredients in this product are intended for cosmetic purposes only and are generally regarded as safe. There are, however, rare occasions where individuals may be allergic to one or more ingredients in the spray tan solution. On The Glow21 is not responsible for any allergic reactions. We advise you to contact your doctor if you have a reaction to the solution or if you have respiratory illnesses such as asthma or skin conditions.
- Some fabrics may be stained by the spray tan solution, please be careful until you have your first shower to wash off the bronzer.
- Pregnant or nursing women should contact their doctor to ensure it is safe for you to spray tan.
- This product does not contain sunscreen. Our solution is made from 99% organic ingredients; however, some individuals may be allergic to organic ingredients such as nut extracts.

I hereby consent to receive airbrush tanning services from On The Glow21. To my knowledge, I have no medical condition or allergies that would prevent me from having this application done. I have been advised to discontinue use and consult my physician if any reaction occurs. I do not hold On The Glow21 liable to any reactions that may occur during or after this application.
